Rochester, N. Y. April 21, 1883.

Prof. Henry M. Seely

Dear Sir

We can help you very little in the way of Silurian sponges. — We have only one labeled Tetracladina Segnonia? Dyer puts the Cin. group, Ky in. We have some very nice siliceous from Holland Astylospongia praemorsa Gold. at .60 .80 & $1. —

We have several English correspondents which we think might procure the fossil you wish from Oldpick, Malvern, Annestry &c. Shall we send for them for you?

When you ask about Operculated shells we understood that you mean modern shells, are we right? Prof. Ward is at work now on a catalogue — that department but it may not be published before Jan, If you desire they will make you a list of the shells when the Opercula can be furnished with them — probably — but — 50 or 60 — names.

Truly yours

Ward & Howell
